

Good Clinical Laboratory Practice (GCLP)

biosafety4u.berlin GmbH
Schulzestraße 20
13187 Berlin
GERMANY

A gap analysis can identify significant gaps between your current QA program and GCLP expectations.

An extensive checklist will be shared with you in advance, bringing you in the position to evaluate your current QA program on your own.

A GCLP training will align your team to current GCLP expectations. Also available separately, either on-site or remote.

A 2-days GCLP audit will reveal the most relevant issues on your way to GCLP compliance, closed out with a GCLP coffee Q&A round table.

A comprehensive Audit Report will be shared indicating the way to GCLP compliance.

A Quality Audit Certificate will be issued – just add a value to your RFP responses.
